THEORETICAL AND MATHEMATICAL PHYSICS

Volumes 58-61, 1984

(A translation of Teoreticheskaya i Matematicheskaya Fizika)

Volume 58, Number 1 January, 1984

	Engl./Russ.
1/N Expansion in the Supersymmetric CP^{N-1} Model – V. K. Krivoshchekov and P. B. Medvedev	1 / 3
Solutions of the Classical Yang–Baxter Equation for Simple Superalgebras – D. A. Leites and V. V. Serganova	16 / 26
Application of Inverse Scattering Method to Singular Solutions of Nonlinear Equations. III – V. A. Arkad'ev	24 / 38
Space–Time Structure of Radiative Corrections – S. V. Vyshenskii	32 / 50
Connection Between the Approximating Hamiltonian Method and Theta-Function Integration – E. D. Belokolos and D. Ya. Petrina	40 / 61
Renormalization-Group Approach to the Theory of Turbulence. Inclusion of a Passive Admixture – L. Ts. Adzhemyan, A. N. Vasil'ev, and M. Gnatich	47 / 72
Functional Integrals for Generalized Fokker–Planck Equation – V. G. Morozov	52 / 79
Hierarchical Vector Model of a Ferromagnet in the Method of Collective Variables. The Lee–Yang Theorem – Yu. V. Kozitskii	63 / 96
Theory of Single-Mode Laser Radiation for Dicke Type Model Systems – G. O. Balabanyan	72 / 109
Mayer Expansions for Gas of Contours at Low Temperatures and in Arbitrary External Fields for the Multicomponent Ising Model – A. G. Basuev	80 / 121
Sommerfeld–Watson Summation of Perturbation Series – Yu. A. Kubyshin	91 / 137
Ginzburg–Landau Functional for Liquid–Vapor Phase Transition – Yu. M. Ivanchenko and A. A. Lisyanskii	97 / 146
The Inverse Scattering Method in a Form Invariant with Respect to Representations of the Internal Symmetry Algebra – A. N. Leznov	103 / 156

Volume 58, Number 2 February, 1984

Oscillating Universe in the Case $p \neq 0$ – S. G. Aman and M. A. Markov	107 / 163
1/N Expansion: Calculation of Anomalous Dimensions and Mixing Matrices in the Order 1/N for N × p Matrix Gauge-Invariant σ Model – A. N. Vasil'ev, M. Yu. Nalimov, and Yu. R. Khonkonen	111 / 169
Hilbert Problem with Unitary Coefficient Matrix – V. M. Muzafarov	121 / 184
Nonlinear σ Model for the Dodd–Bullough Equation – V. V. Nesterenko	126 / 192
Nonlinear Realization of the Conformal Group in Two Dimensions and the Liouville Equation – E. A. Ivanov and S. O. Krivonos	131 / 200
Bound States of the Transfer Matrix of the Ising Model – Sh. S. Mamatov	140 / 213
Two-Loop Approximation in the Background Field Formalism – S. L. Shatashvili	144 / 219
Clifford Algebras as Superalgebras and Quantization – D. A. Leites	150 / 229
Adiabatic Perturbation of a Periodic Potential – V. S. Buslaev	153 / 233
Reconstruction of the Interaction Potential in Quasiclassical Scattering – D. I. Abramov	160 / 244
Quasipotential Wave Functions of a Relativistic Harmonic Oscillator and Pollaczek Polynomials – N. M. Atakishiev	166 / 254
Complete Phase Diagrams with Respect to External Fields at Low Temperatures for Models with Nearest-Neighbor Interaction in the Case of a Finite or Countable Number of Ground States – A. G. Basuev	171 / 261
Classification of Quasione-Dimensional Peierls–Fröhlich Conductors – E. D. Belokolos and I. M. Pershko	183 / 279
Cluster Expansion for Gibbs Perturbation of a Massless Gaussian Field – R. R. Akhmitzyanov, V. A. Malyshev, and E. N. Petrova	192 / 292
Equivalence of Two Forms of the Nonequilibrium Statistical Operator – M. I. Auslender and V. P. Kalashnikov	196 / 299

Fierz Identities in Spaces of Nonintegral Dimension – L. V. Avdeev 203 308
Two-Dimensional Ice-Type Vertex Model with Two Types of Staggered Sites. II. A System of Two Interacting Modified KDP Models – R. Z. Bariev 207 315

Volume 58, Number 3 March, 1984

Spectrum of Three-Particle Clustering Operator – Sh. S. Mamatov and R. A. Minlos..... 211 323
A Class of Non-Gaussian Functional Integrals – M. M. Dubovikov..... 215 329
Multichannel Green's Functions and Perturbation Theory for Multichannel Problems – A. I. Ignat'ev and V. S. Polikanov..... 220 338
Calculation of Feynman Diagrams by the "Uniqueness" Method – D. I. Kazakov 223 343
Nonlinear Abelian Chromodynamics – V. F. Tokarev..... 231 354
Duality and Froissart Saturation – N. I. Glushko, N. A. Kobylinskii, E. S. Martynov, and V. P. Shelest..... 239 367
Relativistic String with Fixed End Points – M. Yu. Pozdeev, G. P. Pron'ko, and A. V. Razumov..... 246 377
Some Aspects of the Dynamics of the Generalized Ising Model in a Transverse Field – G. O. Berim and A. R. Kessel'..... 254 388
Generalized Solutions of Gibbs Type for the Bogolyubov–Strel'tsova Diffusion Hierarchy – V. I. Skripnik..... 260 398
Hydrodynamic Fluctuations in Inhomogeneously Heated Gas – V. V. Belyi 275 421
Influence of Correlations of the Scattering Potential on the Localization Length in One-Dimensional Conductors – L. V. Chebotarev 285 436
Theory of Liquid Magnets – I. A. Vakarchuk, G. V. Ponedilok, and Yu. K. Rudavskii..... 291 445
Spectrum of the Bloch Electron in a Magnetic Field in a Two-Dimensional Lattice – V. A. Geiler and V. A. Margulis..... 302 461
Ground States of One-Dimensional Antiferromagnetic Models with Long-Range Interaction – A. A. Kerimov..... 310 473

Volume 59, Number 1 April, 1984

Superanalysis. I. Differential Calculus – V. S. Vladimirov and I. V. Volovich..... 317 3
Algebras of Unbounded Operators and Vacuum Superselection Rules in Quantum Field Theory. I. Some Properties of Op* Algebras and Vector States on Them – A. V. Voronin, V. N. Sushko, and S. S. Khoruzhii..... 335 28
Analytic Continuation of the Sturm Expansion of Coulomb Green's Functions to the Region of the Continuous Spectrum – N. L. Manakov, S. I. Marmo, and A. G. Fainshtein 351 49
"Fall Toward the Center" in Quasipotential Theory – V. Sh. Gogokhiya..... 357 58
Hamiltonian Structure of the Nonlinear Sigma Model in Light Front Coordinates – S. B. Pereslegin and V. A. Franke..... 365 70
Classical Yang–Mills Field Theory with Nonstandard Lagrangians – A. I. Alekseev and B. A. Arbuzov..... 372 80
Production of Colored Scalars with Large Transverse Momenta – I. S. Avaliani, V. A. Matveev, and L.A. Slepchenko..... 379 91
Distribution Functions of Systems of Charged Particles in a Spatially Inhomogeneous Medium – D. Ya. Petrina..... 387 104
Moments of the Distribution Function and Kinetic Equation for Stochastic Motion of a Nonlinear Oscillator – V. V. Sokolov..... 396 117
Methods of the Theory of Current States in Superconducting SNS Sandwiches at Near Critical Temperatures – A. V. Svidzinskii and L. V. Golubev..... 404 129
Theory of Spin Glasses Based on the Principle of Stationarity of the Free Energy. Infinite-Range Model – M. I. Vladimir, L. A. Dogotar', and V. A. Moskalenko.. 411 139
Reflection Positivity and Models with Noncompact Spin – S. B. Shlosman..... 421 154

Volume 59, Number 2 May, 1984

Analytic Properties of Multiparticle Production Amplitudes – B. V. Medvedev, V. P. Pavlov, M. K. Polivanov, and A. D. Sukhanov..... 427 163

Lattice Completely Integrable Regularization of the Sine-Gordon Model for Small Coupling Constants – N. M. Bogolyubov and A. G. Izergin	441	183
Scattering of Solitons by Quantum Excitations – V. B. Tverskoi	452	200
Reduction in the Model of a Relativistic String for Arbitrary Dimension of Minkowski Sapce – B. M. Barbashov, V. V. Nesterenko, and A. M. Chervyakov	458	209
Invariant Definition of Relativistic Spin States in Classical and Quantum Theories with an External Field – V. A. Bordovitsyn and I. M. Ternov	465	220
Scattering of Supersymmetric Partons at Large Momentum Transfers – V. A. Matveev and L. A. Slepchenko	467	224
Rigorous Upper Bounds on Integrals of the Scattering Amplitude – Yu. S. Vernov, M. N. Mnatsakanova, and M. S. Chubarov	473	233
Theory of Single-Gap Configurations of a Relativistic String – G. P. Pron'ko	478	240
Green's Functions in the Dicke Model. II. Superradiant State – N. N. Bogolyubov (Jr), A. R. Kazaryan, A. M. Kurbatov, and V. N. Neskoromnyi	483	249
Three-Dimensional Orientational Relaxation of a Brownian Particle with Induced Dipole Moment – B. A. Storonkin	491	262
Application of the Method of Ordered Operators in the Theory of Liquid Metals – G. O. Balabanyan	499	276
Aspects of the Diagram Technique for Hubbard Operators – A. V. Vedyaev and M. Yu. Nikolaev	510	293
Relaxation of the Energy of the Two-Dimensional Ising Model in the Absence of an External Constant Magnetic Field – G. O. Berim and R. G. Kamalov	513	297
Stabilization of Superconductivity in Spin Glass – V. A. Moskalenko, M. E. Palistrant, and V. V. Skafaru	519	307
Influence of the Break in the Differential Cross Section on the Profile Function – G. G. Arushanov, E. I. Ismatov, I. M. Kirson, and M. S. Yakubov	524	315

Volume 59, Number 3 June, 1984

Symmetry Properties and Dynamics in Gauge Theories with Scalar Fields – V. A. Matveev, A. N. Tavkhelidze, and M. E. Shaposhnikov	529	323
Model of a Zero-Range Potential with Internal Structure – B. S. Pavlov	544	345
Asymptotics of the Scattering Problem for a System of One-Dimensional Particles – L. V. Polterovich	550	354
Integrable Supermanifolds and Associated Nonlinear Equations – M. V. Savel'ev	560	367
Absolutely Convergent α Representation of Analytically and Dimensionally Regularized Feynman Amplitudes – V. A. Smirnov	563	373
Energy Level Shifts and Transition Probabilities in a Relativistic Atom – M. A. Braun	573	388
Collinear Three-Particle Collisions in the Quasiclassical Approximation. Excitation, Dissociation, and Exchange – S. Ya. Aksenov and V. S. Potapov	581	400
Renormalization-Group Method in the Self-Avoiding Random Walk Problem – V. I. Alkhimov	591	413
On the Microscopic Theory of Quantum Binary Solutions – I. A. Vakarchuk and E. I. Zubko	598	423
Inverse Problem of Quantum Mechanics for Attractive Potentials. The Discrete Spectrum – V. B. Gostev and A. R. Frenkin	603	432
Integration of the φ^4 Model in Elliptic Jacobi Functions and Investigation of them by the Phase Plane Method – V. E. Grishin and V. K. Fedyanin	609	440
Influence of Cubic Anisotropy on the Ground State and Thermodynamic Properties of Heisenberg Magnets – V. V. Val'kov and T. A. Val'kova	617	453
Light Fermions and Instantons in the σ Model – R. G. Ismagilov	625	465
Scattering by Long-Range Potentials at Low Energies – A. A. Kvitsinskii	629	472

Volume 60, Number 1 July, 1984

Minkowski Space as a Basis for a Physical Theory of Gravitation – A. A. Logunov and A. A. Vlasov	635	3
Classification of Exactly Integrable Embeddings of Two-Dimensional Manifolds. The Coefficients of the Third Fundamental Forms – M. V. Savel'ev	638	9
Decay of a Bound State of a μ^+u^- Pair into an e^+e^- Dalitz Pair and a Photon – G. A. Kozlov, S. P. Kuleshov, V. I. Savrin, V. V. Sanadze, and N. B. Skachkov	647	24

On the Definition of Superspace – A. S. Shvarts	657	37
Mappings of Supermanifolds – A. A. Voronov	660	43
The R Operation in Theories with Massless Particles – S. A. Anikin and V. A. Smirnov	664	49
Critical Dynamics as a Field Theory – N. V. Antonov and A. N. Vasil'ev	671	59
Nonperturbative Vacuum Energy Density in Two-Dimensional Scalar Models – S. K. Karepanov	680	72
Algebras of Observables of Nearly Canonical Physical Theories. I – G. K. Tolokonnikov	690	87
Time Asymptotics of the Velocity Autocorrelation Function in the Lorentz Model. II – V. D. Ozrin	694	93
On the Theory of the Conductivity of Crystals – V. F. Los'	703	107
Clustering in Condensed Media – E. D. Belotskii and B. I. Lev	711	120
Normal Modes and Relaxation Processes in Magnetically Ordered Materials with Single-Ion Anisotropy – D. A. Garanin and V. S. Lutovinov	720	133
Orientational Phase Transitions in Quantum Spin Systems with Two-Component Order Parameter – A. V. Chubukov	728	145
Cluster Expansion and Spectrum of the Transfer Matrix of the Two-Dimensional Ising Model with Strong External Field – P. V. Khrapov	734	154
Perturbation Theory for Anharmonic Crystals – I. P. Bazarov and P. N. Nikolaev	735	156

Volume 60, Number 2 August, 1984

Spherically Symmetric Solution in the Theory of Gravitation Based on Minkowski Space – A. A. Vlasov and A. A. Logunov	739	163
Superanalysis. II. Integral Calculus – V. S. Vladimirov and I. V. Volovich	743	169
Operator Product Expansion in Two-Dimensional Quantum Electrodynamics – A. A. Pivovarov, A. N. Tavkhelidze, and V. F. Tokarev	765	199
Algebraic and Hamiltonian Methods in the Theory of Non-Abelian Anomalies – L. D. Faddeev and S. L. Shatashvili	770	206
Renormalization Group and Functional Self-Similarity in Different Branches of Physics – D. V. Shirkov	778	218
Dynamic Stochasticity and Quantization – B. V. Medvedev	782	224
A Method of Approximate Calculation of Feynman Diagrams. II – O. I. Zav'yalov	797	245
Intensity of Superradiant Generation in Two-Level Systems – N. N. Bogolyubov (Jr), Fam Le Kien, and A. S. Shumovskii	803	254
Correlation Functions of One-Dimensional Bose Gas in Thermodynamic Equilibrium – N. M. Bogolyubov and V. E. Korepin	808	262
Formulation of Boundary Conditions for the BBGKY Hierarchy with Allowance for Local Conservation Laws – D. N. Zubarev and V. G. Morozov	814	270
Exact Solutions of the Nonlinear Boltzmann Equation and the Theory of Relaxation of a Maxwellian Gas – A. V. Bobylev	820	280
Twistor Connection and Conformal Gravitation – S. A. Merkulov	842	311
Conformal Bootstrap Equations for Yang–Mills Type Interaction – A. N. Vasil'ev, M. M. Perekalin, and Yu. M. Pis'mak	846	317

Volume 60, Number 3 September, 1984

Algebras of Unbounded Operators and Vacuum Superselection Rules in Quantum Field Theory. II. Mathematical Structure of Vacuum Superselection Rules – A. V. Voronin, V. N. Sushko, and S. S. Khoruzhii	849	323
Trace Formula in General Hamiltonian Mechanics – V. S. Buslaev and E. A. Nalimova	863	344
Quantum Gel'fand–Levitan–Marchenko Equations for the Sine–Gordon Model – F. A. Smirnov	871	356
Fock Functional Method and Gauge Invariance – Yu. V. Novozhilov	881	372
Method of Approximate Calculation of Feynman Diagrams. III – O. I. Zav'yalov	891	387
Asymptotic Expansions and Qualitative Analysis of Finite-Dimensional Models in Nonlinear Field Theory – V. M. Eleonskii, N. E. Kulagin, N. S. Novozhilova, and V. P. Silin	896	395
New Functional Representation in Superspace for the Hubbard Model – V. M. Zharkov	902	404

Eigenfunctions of Quadratic Hamiltonians in the Wigner Representation – É. A. Akhundova, V. V. Dodonov, and V. I. Man'ko	907	413
Inversion Transformation in the Schrödinger Equation – Yu. N. Demkov and N. V. Semenova	914	423
The Concept of Quasiaverages and Spaces of States – N. N. Bogolyubov (Jr), A. S. Shumovskii, and V. I. Yukalov	921	432
Asymptotic Solutions of the Landau–Lifshitz Equation and Quasisteady Motion of Bubbles in Magnetic Films – V. P. Maslov and V. M. Chetverikov	931	447
Random Cluster Expansions in the High-Temperature Region – I. V. Nikolaev	945	468
Free Energy of a Cubic Ferroelectric in the Ring Approximation – I. O. Maier	951	476

Volume 61, Number 1 October, 1984

Infinite-Range Limit for Correlation Functions of Lattice Systems – L. A. Pastur and M. V. Shcherbina	955	3
Supersymmetric Mechanics: A New Look at the Equivalence of Quantum Systems – A. A. Andrianov, N. V. Borisov, M. V. Ioffe, and M. I. Eides	965	17
Bäcklund Transformations of the Painlevé Equations and Rational Solutions of the Korteweg–de Vries Equation – V. A. Andreev	973	29
Factorizing Particles on a Half-Line and Root Systems – I. V. Cherednik	977	35
A Method of Realizing the Algebra of Commutation Relations – K. A. Sveshnikov	984	45
Trace Formula in Lagrangian Mechanics – V. S. Buslaev and E. A. Nalimova	989	52
Covariant Quantization of the Bag Model – A. E. Dorokhov	998	64
Integral Equalities for Functions that Satisfy Dispersion Relations – Yu. S. Vernov, A. V. Konovalov, and M. N. Mnatsakanova	1012	85
Asymptotic Solutions of Whispering-Gallery Type for the Time-Dependent Schrödinger Equation – A. A. Denisov	1017	92
Two-Dimensional Hydrogen Atom. I. Elliptic Basis – L. G. Mardoyan, G. S. Pogosyan, A. N. Sisakyan, and V. M. Ter-Antonyan	1021	99
Asymptotic Behavior of the Spectrum of Mixed States for Self-Consistent Field Equations – M. V. Karasev	1034	118
On the Nature of the Quantum Corrections in the Case of Stochastic Motion of a Nonlinear Oscillator – V. V. Sokolov	1041	128
Structure of the Spectrum of a Bloch Electron in a Magnetic Field in a Two-Dimensional Lattice – V. A. Geiler and V. A. Margulis	1049	140
Two-Dimensional Supersymmetric Nonlinear Equations Associated with Embeddings of the Subsuperalgebra osp(1, 2) in Lie Superalgebras – A. N. Leznov and M. V. Savel'ev	1056	150
Self-Similar Solutions of the Equations of General Relativity Associated with the Solutions of P-Type Equations – V. V. Tsegel'nik	1059	155

Volume 61, Number 2 November, 1984

Structure of Quantum L Operators for the R Matrix of the XXZ Model – V. O. Tarasov	1065	163
Algebras of Observables of Nearly Canonical Physical Theories. II – G. K. Tolokonnikov	1072	174
Factorization Method and Darboux Transformation for Multidimensional Hamiltonians – A. A. Andrianov, N. V. Borisov, and M. V. Ioffe	1078	183
Oscillating Weakly Localized Solutions of the Korteweg–de Vries Equation – R. G. Novikov and G. M. Khenkin	1089	199
N-Soliton Solution of Chiral Fields on Grassmann Manifolds (σ Model) – A. Yu. Orlov	1099	214
Phase Separation in the φ^4 Hierarchical Model – P. M. Blekher	1107	226
Spontaneous Compactification into Symmetric Spaces with Nonsimple Holonomy Group – D. V. Volkov, D. P. Sorokin, and V. I. Tkach	1117	241
Decomposition of a N = 2 Extended Scalar Superfield into Irreducible Supersymmetry Representations – S. V. Ketov and I. V. Tyutin	1126	254
One-Loop Corrections in the O(5) Skyrme Model – Yu. N. Kafiev	1133	267
Alpha Representation and Spectral Properties of Multiparton Functions – A. V. Radyushkin	1144	284
Synchrotron Radiation of an Electron in a Coherent State – A. A. Bobrov, O. F. Dorofeev, and G. A. Chizhov	1149	293

Disordered Substitutional Magnets in a Magnetic Field – V. P. Iordatii, L. Z. Kon, and V. A. Moskalenko 1154 301
Collisionless Transport Equation for Photons in a Moving Medium – V. V. Gonyaev and M. I. Kalinin 1161 312

Volume 61, Number 3 December, 1984

Theory of Gravitation Based on Minkowski Space and the Principle of Geometrization – A. A. Vlasov, A. A. Logunov, and M. A. Mestvirishvili 1167 323
Relativistic Theory of Gravitation – A. A. Logunov and M. A. Mestvirishvili 1170 327
Methods of Weyl Representation of the Phase Space and Canonical Transformations. I – V. G. Budanov 1183 347
Lattice Sine-Gordon Model with Local Hamiltonian – N. M. Bogolyubov and A. G. Izergin 1195 364
A Generalization of the Model with ϕ^4 Interaction – D. V. Meshcheryakov 1205 378
Local Hamiltonians for Integrable Quantum Models on a Lattice. II – V. O. Tarasov 1211 387
Renormalization-Group Equations in Curved Space-Time – I. L. Bukhbinder 1215 393
System of Exact Equations for the Mass Operator of Quasiparticles Interacting with Phonons – N. V. Tkach 1220 400
Structure Functions of Deep Inelastic Scattering and e^+e^- Annihilation at Small x in QCD – G. M. Zinov'ev, O. P. Pavlenko, A. M. Snigirev, and V. P. Shelest 1226 408
Dynamical Variable and Chiral Properties of the Vacuum in the Schwinger Model – A. V. Kiselev 1233 419
Solvable Model of the Relativistic Two-Fermion Bound-State Problem with Infinitely Rising Potentials – Z. K. Silagadze and A. A. Khelashvili 1241 431
Hopping Migration of Quasiparticles on One-Dimensional Disordered Systems – K. A. Pronin .. 1249 442
Dynamics of Orientation Fluctuations. Order Parameter of a Nematic Liquid Crystal – V. A. Konoplev and Vl. K. Pershin 1256 453
Cluster Properties and Bound States of the Yang-Mills Model with Compact Gauge Group. I – R. A. Minlos and P. V. Khrapov 1261 460
Representations of the Solutions of Some Many-Component Problems of Linear Conjugation in the Case when the Partial Indices are Negative – O. V. Mesnargiya 1265 466
A Parametrization of the Baker-Campbell-Hausdorff Formula for Boson Superfields in a Lie Algebra – M. A. Gabeskiriya 1268 470
